

2982014 TECHNICAL MACHINE SHEET

Product:	Labeling machine Krones Multimodul 50 000 bph
Product number:	2982014
Manufacturer:	Krones
Manufacturer's type:	Multimodul
Manufacturing year:	2006
Capacity:	50 000 bph
Status:	Installed
Condition:	Very good

Pictures:

JADE Machine Description:

This labeling machine was manufactured by Krones in year 2006 and it currently has three labeling stations, all for ready cut paper labels with gold glue attachment. The machine is still installed and in very good condition:

Capacity:	50 000 bottles per hour.
The number of labels:	3 labels (front, back, neck).
Label material:	paper.
Type of glue:	Cold glue

Krones modular labeling machines can be equipped with several of the same type or different labeling stations. The individual labeling stations are fastened on the machine's base frame and changed, if required. They each have a separate drive which is electronically connected with the main drive. This compact basic machine is easily accessible as it does not have a conventional table top. The machine front table with its in-feed and discharge star wheels can be fully removed as of table diameters of 1,200 mm.

Each container plate on the container table is powered by a computer controlled actuator. The bottle rotations required for rolling on the labels are conducted according to a set program. Cold-glue and hot-glue labeling as well as the application of self-adhesive labels can be executed on one container table with different labeling stations.
