

3142015 TECHNICAL MACHINE SHEET

Product: KEG Filling unit for 5 liter Party-KEG,
Semiautomatic Esau Hueber 110 kph
Product number: 3142015
Manufacturer: Esau & Hueber GmbH, Germany
Manufacturer's type: SEMI-FILL 110
Manufacturing year: 2007
Capacity: 110 kegs/hour, 5 liter kegs
Status: Dismantled professionally
Condition: Very good

JADE Machine Description:

This KEG filler is semiautomatic with 3 filling heads, Handtmann MMS micro filtration system and cap closing unit manufactured in 2007 and hardly used and it was dismantled in year 2012 - the equipment was in excellent condition when dismantled professionally and placed in a container. The line has filling capacity of 110 kegs / hour. The empty and clean keg is placed manually onto filler and lifted manually back to the transport belt once filled. The sensor recognizes placed keg and starts filling automatically, a probe sensor in return air channel controls the filling level. The equipment purges kegs with CO₂ for air removal and then pressurizes the keg. The beer valve and return valve are opened simultaneously and the keg will be filled from bottom to top. Once filled, the kegs will be moved to closing unit and further along the transport belt ready for packaging. Beer filling system includes micro filtration system for high efficiency separation of particles and microorganism by multi-layer filter sheets made of cellulose and diatomaceous.

Manufacturer: Esau & Hueber GmbH, Germany
Made in year: 2007
Capacity: 110 pieces of 5 litres kegs / hour
Filling Unit: Esau & Hueber SEMI-FILL with 3 filling heads
Cap Closing Unit: Esau & Hueber SER semiautomatic
Beer Filtration: Handtmann MMS 070 - capacity 30 HL / h
Control system: Siemens Simatic S7-300
